SOLUTION SERIES

Ultimate utility in a TAC case

A versatile Thermally Advanced Chassis (TAC) designed case for building fully-configured, high-performance computers. Equipped with a 400Watt SmartPower 2.0 ATX12V v2.01 power supply and one 120mm case fan for cool, quiet operation. An ideal case for system builders seeking high-capacity and rock-solid reliability. Eleven drive bays and front fan mount give you maximum flexibility in building powerful, high capacity systems, and quick release side panel and drive cage for easy access. What more could you want?

UCC 13#: 0761345-93800-6 US

Chassis air guide designed to provide efficient cooling for CPUs.

Features:

- Quiet 400 Watt SmartPower 2.0 ATX12V v2.01 Power Supply
  - Dual 80mm fans in flow-through configuration
  - Unique Dual Fan Design: The external exhaust fan starts, stops and adjusts its speed in response to system temperature, while the other fan is temperature regulated
  - Temperature-response system ensures cooler, quieter operation
  - Active PFC delivers environmentally-friendlier power (only EU version)
  - Thermally Advantaged Chassis (TAC) compliant for the latest hot CPUs and graphics cards.
- 11 Drive Bays deliver maximum expandability
  - 4 external 5.25"
  - 2 external 3.5"
  - 5 internal 3.5"
  - Quick-release drive cage allows easy installation and replacement of external 3.5" drives
  - Drive rails allow easy installation of 5.25" devices
- 2 Front USB 2.0 ports for easy multimedia connections
- Generous cooling capacity protects your valuable components
  - 1x Three-speed 120mm TriCool fan
  - Mount for optional 120mm front fan
  - Chassis air guide provides efficient cooling for even the hottest CPUs. Includes mount for optional 80mm fan
  - Additional venting to cool the hottest video cards
- Fits motherboards up to Standard ATX (12" x 9.6" / 30.5 x 24.4 cm)
- Built-in washable air filter keeps harmful dust out of your case
